SURVEYING SERVICES

Services	LiDAR Survey (Terrestrial Laser Scan and SLAM)	Drone (UAV) Survey	Ground Penetrating Radar (GPR) Survey	Matterport Survey
What it Delivers	Highly accurate, detailed 3D data of buildings and sites.	High-resolution aerial imagery, orthomosaics, photogrammetry, and 3D models	Detects utilities, voids, and sub- surface structures	3D online, immersive virtual tour of a building, providing the layout and dimensions.
Ideal for	Building measured surveys, creation of 2D CAD drawings (Scan to CAD), 3D modelling, digital twins & accurate 3D dimenstions. Asset management, BIM (Scan to BIM), refurbishment or renovation work.	Roof inspections, asset management, site mapping	Utility mapping, archaeology, remedial works	Asset management, as built documentation, floor plans, marketing. Document existing conditions, monitor progress, and facilitate design reviews.
Key Benefits	Fast capture, accurate measurement data, minimal disruption. Avoid revisiting site, create an archive record of the site.	Safe access to hard-to-reach areas, rapid turnaround, flexible outputs.	Avoid costly surprises. Accurate geophysical data, non-invasive technique	A virtual tour that can be used to reduce the need for physical site visits. Tag and comment on features to help collaboration. Archive record of a site.

Get the Data That Drives Decisions

Developers. Landlords. Construction professionals.

Work smarter, faster, and safer with NBI's surveying solutions.
